Eweniyi Oloruntoba Martins

Software Engineer | Technical Program Manager | Product Owner

United Kingdom · oloruntobaeweniyi@gmail.com · +44 7377 503 960 · linkedin.com/in/martins-eweniyi-919168156/

PROFESSIONAL SUMMARY

I am a skilled Full stack Software Developer and Product Owner with experience delivering innovative technology solutions and managing product lifecycles till launch. I act as a link between technical teams and business stakeholders to create products that meet market needs and exceed expectations. I have proven expertise in developing web applications, and driving projects using agile methodologies.

CORE COMPETENCIES

Technical & Architecture: MERN Stack (MongoDB, Express, React, Node), Ruby on Rails, TypeScript, REST & GraphQL APIs, AWS, CI/CD, MongoDB / PostgreSQL / MySQL, System & API Design Reviews

Delivery & Programme Management: Agile / Scrum, Sprint Planning, Backlog Prioritisation, Roadmapping, OKRs, Stakeholder Management, Risk & Dependency Mapping, Release Management, Technical Specification & PRD Writing

AI & Automation: Cursor, GitHub Copilot, Claude, ChatGPT, Gemini; AI-augmented PRD & user-story drafting, edge-case generation, code review acceleration; vendor selection for AI / ML services (computer-vision KYC, behavioural fraud signals)

Tools: Jira, Confluence, Trello, Notion, Postman, Git, Apollo Client, Figma

Languages: Ruby (Ruby on rails), JavaScript (React JS, NodeJS), Typescript

PROFESSIONAL EXPERIENCE

Software Engineer · **Koplio Limited**

UK, Remote · October 2026 – Present

- Led the end-to-end product development and lifecycle for digital identity verification and onboarding solutions, ensuring compliance with KYC and AML regulations and business objectives.
- Collaborated with engineering, UX, compliance, and legal teams to deliver secure, scalable product features, improving customer onboarding time by 20%.
- Owned the product roadmap and backlog prioritisation, delivering features such as document verification, Transaction Monitoring, and identity validation processes, reducing operational risk and fraud exposure.
- Integrated third-party services including identity verification APIs, business verification, and credit reference systems to strengthen compliance capabilities and platform reliability.
- Facilitated stakeholder workshops, sprint reviews, and product demos, incorporating feedback metrics to guide prioritisation and continuous improvement, improving customer satisfaction by 20%.
- Acted as a subject matter contributor in fintech onboarding and data signals, supporting informed product decisions based on user needs and market trends.

Full Stack Developer / Product Owner · **PiggyVest**

UK, Remote · September 2024 – Present

- Designed and delivered digital identity, onboarding and AML compliance features across engineering, compliance and design teams, reducing onboarding time by 20% while decreasing downstream KYC verification failures.
- Designed technical specifications, collaborated on API contracts and leveraged AI coding tools to accelerate implementation, testing and code reviews.
- Collaborated closely with engineering teams to deliver iterative releases, improving sprint predictability while maintaining high product quality.
- Partner with legal and compliance teams to translate KYC and AML regulations into scalable product and engineering solutions.

Frontend Engineer / Product Owner (part-time) · **CarrotCredit**

USA, Remote · March 2025 – June 2026

- Design and build user-facing product features from stakeholder requirements, translating customer feedback into scalable technical solutions.
- Build user-facing features on the MERN stack with WCAG AA accessibility and solid test coverage; use AI coding assistants to compress repetitive work and tighten review cycles.
- Run feedback loops with users and stakeholders, channelling insights into the backlog and improving release predictability through tighter product-engineering collaboration.

Technology Integration Specialist / Digital Coach · **University of Liverpool** *Liverpool, UK · September 2023 – August 2024*

- Audited and streamlined digital systems and workflows across faculty teams, reducing duplicated tooling and operational cost.
- Designed and delivered training on Microsoft 365, Jira, OBS Studio and collaboration platforms, measurably cutting techsupport requests across coached cohorts.
- Led cross-team change initiatives based on user feedback, embedding lightweight agile practices in non-technical teams.

Software Engineer · **BesaCare**

Remote · May 2021 – February 2022

- Led a team of three engineers delivering Ruby on Rails, React and GraphQL applications, contributing to architecture, implementation, code reviews and sprint planning.
- Architected AWS cloud solutions and automated deployments through CI/CD pipelines, increasing release frequency and reducing deployment incidents.
- Built and shipped a responsive marketing site for a healthcare app (React, CSS, Bootstrap) and provided tier-2 technical support to engineers and end users.

EDUCATION

MSc, Advanced Computer Science · University of Liverpool, UK · 2023 – 2024

CERTIFICATIONS & CONTINUOUS LEARNING

- **Project Management Professional (PMP)**, currently in progress (expected Q4 2026).
- **Google Technical Project Management Certificate**, currently in progress (expected Q3 2026).
- **Datalumina Academy**, AI & Data Engineering programme, 2025–2026 (building applied ML and AI delivery expertise).
- **Active mentor and member, Product & Software Engineering community.**

TECHNICAL SKILLS

- **Languages**: TypeScript, JavaScript, Ruby
- **Frontend**: React, Next.js, HTML, CSS
- **Backend**: Node.js, Express, Ruby on Rails
- **Databases**: PostgreSQL, MongoDB, MySQL, Redis
- **Cloud**: AWS
- **APIs**: REST, GraphQL
- **DevOps**: Git, CI/CD, Docker
- **AI**: Cursor, Claude, GitHub Copilot, ChatGPT, Gemini
